Collaborative Media Storage Platform

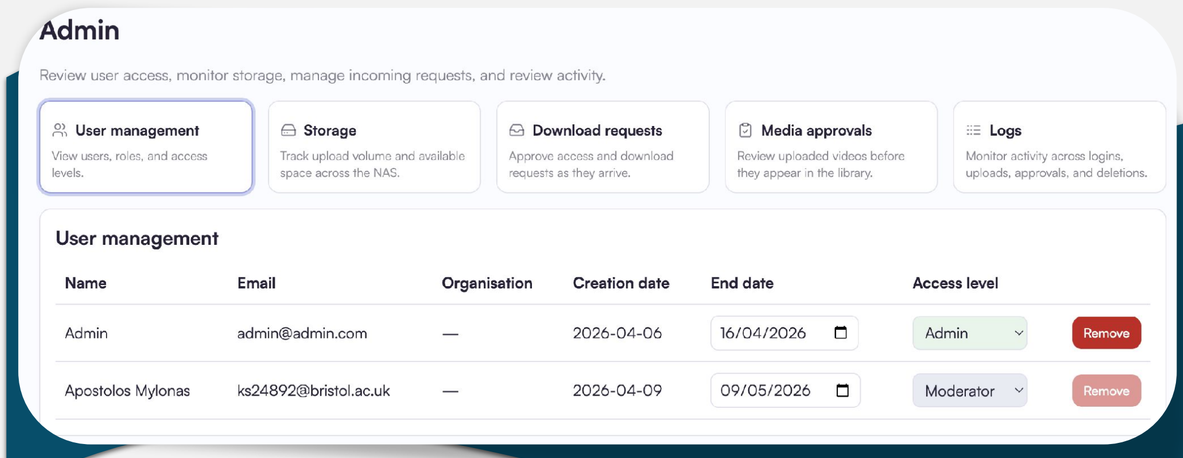

CLIENT BRIEF

- Organise terabytes of footage
- Allow collaboration with partner companies
- Use their local storage system to provide a cost-effective alternative to enterprise cloud storage

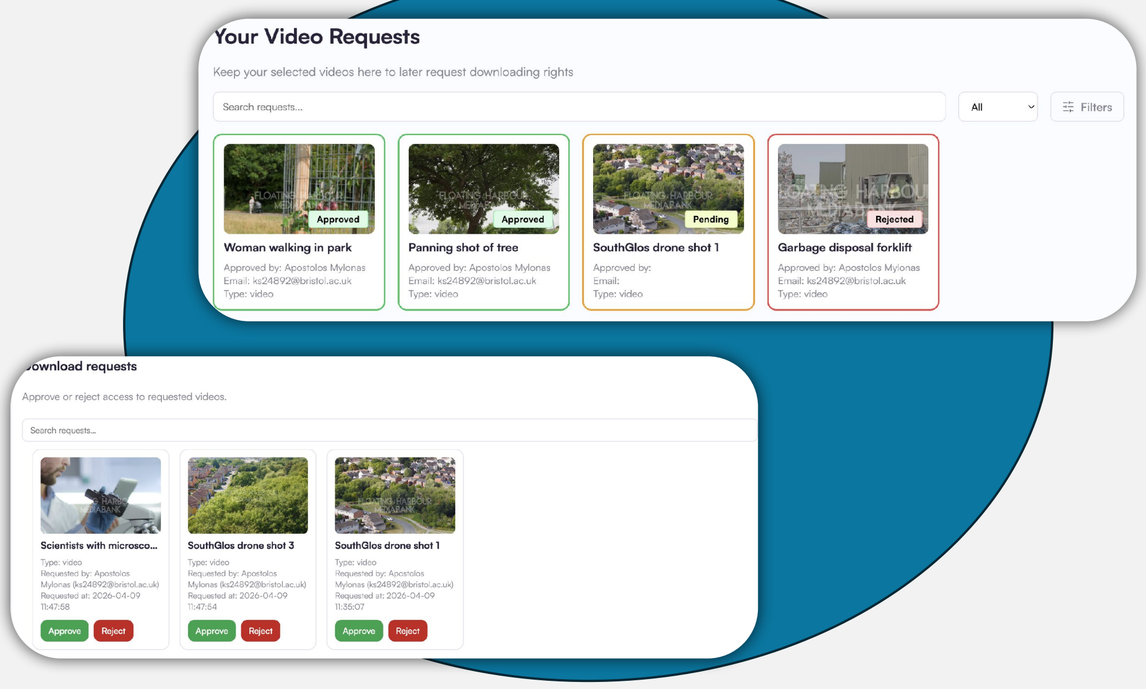

ADMIN WORKFLOW

- Dedicated admin tab to manage requests and remove users and videos from the library.

- Video downloads require admin approval.
- Users can download a watermarked proxy version while waiting for their request to be approved.

CORE FEATURES

- Easily search, filter, and browse videos by keywords, categories, and locations.
- Batch upload and apply mandatory metadata.
- Watermarked thumbnails, previews, and video proxies are automatically generated client-side.

Our Client

Floating Harbour is a Bristol based film studio founded by Richard da Costa, which has worked with 70+ companies and 10 core collaborators including WECA and Netflix. They are on a boat!

Synology NAS

Media is stored on their local hardware, with uploading and downloading done via the dedicated API.
